Helios Coffee Roasters — 2025 Annual Report

Executive Summary

Helios Coffee Roasters closed 2025 with total revenue of $184.6 million, up 12% year over year, driven by strong café traffic and the launch of our subscription program. Chief Executive Officer Mariana Okafor, who joined in March 2024, led a reorganisation of the store operations team into four regional units. Operating margin improved from 9.1% to 10.4% as we renegotiated dairy contracts and reduced waste.

Our subscription program, Helios Daily, reached 61,000 active members by December. Members visit 3.2 times per week on average, compared with 1.4 visits for non-members, and account for 27% of café revenue. We plan to extend member pricing to online bean orders in the first half of 2026.

Strategy for 2026

In 2026 we will open 30 new stores, focusing on the Mountain region where our brand awareness is lowest. We will also pilot a reusable-cup deposit scheme in 15 Seattle cafés, invest $6 million in roastery automation, and introduce a decaf single-origin line. Capital expenditure is budgeted at $22 million, funded entirely from operating cash flow.

Regional Performance

Revenue grew in every region. The Pacific Northwest remains our largest market, while the Southwest posted the fastest growth after 18 openings in Phoenix and Tucson. Quarterly revenue by region is shown in Table 1 (US$ millions).

Table 1: Quarterly revenue by region, 2025 (US$ millions)

Region	Q1	Q2	Q3	Q4	Full year
Pacific Northwest	17.2	18.9	19.6	20.3	76.0
California	10.1	11.0	11.8	12.4	45.3
Southwest	6.4	7.9	8.8	9.6	32.7
Mountain	6.9	7.4	7.9	8.4	30.6
Total	40.6	45.2	48.1	50.7	184.6

Store-level economics improved in all formats. New stores reached break-even after an average of 7 months, down from 9 months in 2024.

Customer Experience

We survey 5,000 customers every quarter. Satisfaction by store format is shown in Figure 1. The gap between formats tells us where to invest in 2026.

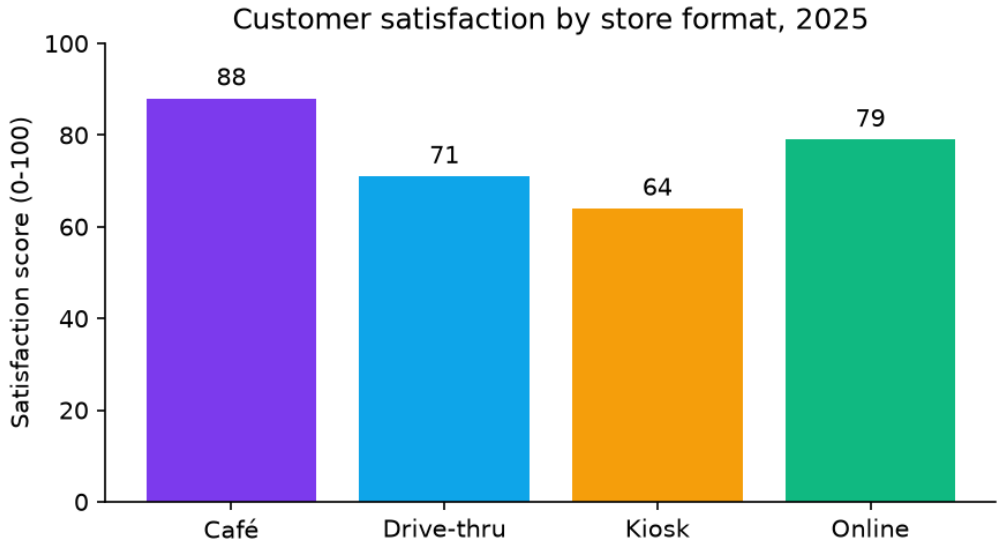

Figure 1: Customer satisfaction by store format, 2025 survey

Supply Chain and Sustainability

All beans are roasted in a single central facility and shipped to stores within 48 hours. Figure 2 shows how coffee moves from partner farms to our stores.

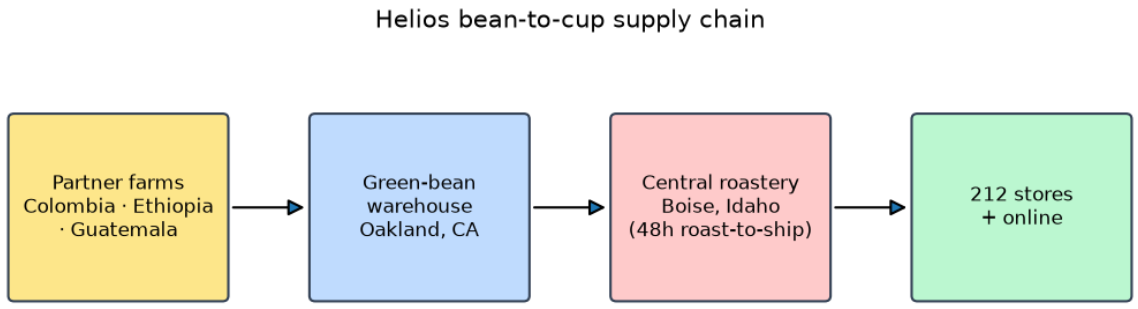

Figure 2: Bean-to-cup supply chain

We buy directly from 140 partner farms. Table 2 summarises sourcing by origin country.

Table 2: Green coffee sourcing by origin, 2025

Origin	Tonnes	Share of volume	Fair-trade certified
Colombia	1,850	41%	78%
Ethiopia	1,120	25%	92%
Guatemala	860	19%	65%
Other	670	15%	40%

Our goal is 85% fair-trade certified volume by 2027. Roastery emissions fell 18% after we switched to a renewable-electricity contract in May. Packaging is now 94% recyclable; the remaining 6% is the valve on our one-kilogram bags, which we expect to replace in 2026.
